

Tired of Wasting Energy?

The SPEED Series

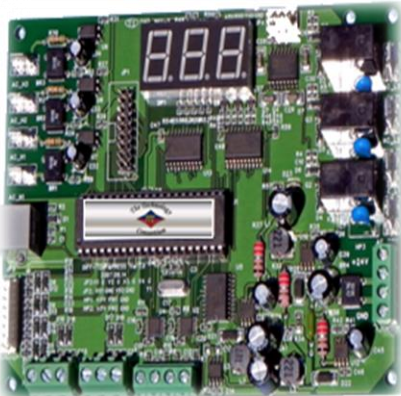

(Smart Power Energy Economizer Device)

***Lower Energy Costs for
Constant-speed Motors...***

Less Torque = Less Waste!

**Dramatically reduce energy consumption
during light loading or low demand!**

Algorithm-driven Smart Microprocessor eliminates waste in constant speed motors Instantly and seamlessly reacts to increased or decreased loads and demands! Changes in motor torque are unperceivable Exclusive Smart Microprocessor/Algorithm for optimum energy saving!

Applications: Constant Speed and Varying Load Motors

- ◆ Escalators, and Moving Sidewalks
- ◆ Conveyors (*varing-load conditions*)
- ◆ Compressors (*Maintains specified pressure*)
- ◆ Petrochemical (*Pumps, Mixers, Agitators*)
- ◆ Saws, Winders, Rolls, Mills, etc.

Specifications:

Input Voltages: 195 - 575 VAC

Single, or 3-Phase Motors

HP Range: 5 - 600 HP

***Cut energy use and costs based on conditions
with updated NASA technology!***

With the SPEED Series...

Constant-speed Motors Have Lower-costs!

Let us show you how the SPEED Series will reduce your Energy Costs!

Don't Assume, Contact us for the Facts...

We Manufacture Solutions...

We are proud to be a Tier One Supplier to:

Please visit our website at: <http://www.TheTechnologyConsortium.com> for additional information on the *HELP System* and *SPEED Series* technologies!
